Process Systems Pump Repair Services & Replacement Parts

Complete pump repair and remanufacture facilities at two locations: Warren, Michigan and Mellott, Indiana. *All Brands repaired and Upgraded - Vertical and Horizontal*. Upgrades include our “Self-Seal” design, which eliminates the need for mechanical seals or stuffing boxes. Whether your pump is IPD/Flowserve, Goulds, Byron Jackson, Johnston, Worthington or other, Process Systems can service it.

- Complete inventory of parts for many makes and models.
- Hazleton Pump repairs performed by factory trained technicians.
- Unconditional **ONE YEAR WARRANTY** on most pump repairs and remanufactures.
- Company-owned fleet of trucks assures that your pump is transported quickly and handled with care.

Pumping Products & Services

The Process Systems Family of Vertical Turbine Pumps-Designed and Manufactured for Your Specific Application:

- Central Coolant Filtration
- Spray Booth/Sludge
- Cooling Towers
- Welder Water
- E-Coat/Epo Paint Systems
- Quench/Scale Pits
- Phosphate Systems
- Waste Treatment
- Industrial Washers
- High pressure Coolant

Proven “seal less” design, featuring enclosed impellers, enclosed line shaft, grease/oil lubrication, or special “Self-Seal” design.

Available with our exclusive Thrust Head* Discharge Head or Hi-Thrust Base, which allows utilization of normal thrust, C-Face motors. Impellers are set and adjusted at the factory - no field adjustment necessary.

Process Systems VP-Magnum® Vertical Process Cantilever Pumps:

- Machine Tool
- Parts Washers
- Scale Pits

Our recessed impeller (vortex) design is specifically designed to handle solids laden fluids, slurries, aluminum, steel or cast iron chips.

The VP-Magnum® CH-2000 is available in two configurations; close-coupled or frame mounted (utilizing Thrust Barrel® power frame design) for larger capacities and longer lengths. Fully cantilevered design eliminates the need for troublesome seals, fluid immersed bearings, or throttle bearings. This assures you of our dry capability with virtually no side load issues associated with immersed bearings. Centrifugal impeller designs also available.

Process Systems High Pressure Packages

Custom designed high pressure pumping systems feature Process Systems patented Multi-Series® Self-Seal pumps, as well as a variety of application specific positive displacement and plunger style pumps. Contact us with your specific application requirements.

Engineered Diversity....

As a member of the Ruthman Companies, Process Systems inc. is pleased to expand our product line to include additional Ruthman Companies brand pump products - designed to meet your specific fluid handling requirements.
